

SECURITY AWARENESS

Train your employees in HYPERSECURE IT

The screenshot displays the DriveLock platform's user interface. On the left, a sidebar navigation includes sections for Quick access, Dashboard, Security Controls (Drives, Devices, Applications, Encryption, Antivirus, Awareness, Vulnerabilities), Inventory (Computers, Users, Software, Devices), Analytics (Events, Threats, Reports), and Administration (Groups, Policies, Rules, Accounts). The main content area is titled "Awareness" and shows three tabs: Content packages, Campaigns, Evaluations, and Events. The "Evaluations" tab is selected, displaying a chart of "Content type" (Training vs Custom) and a pie chart of "State" (Started: 16.67%, Completed: 33.33%, In progress: 16.67%, Aborted: 33.33%). Below these are two tables: "Filter" (Grouped by: Name, All, Search) and "Filter summary" (Last best result: Yes). The "Filter summary" table lists 11 items, each with columns for Content type (Training), Package, Campaign, User name, State, Start date, End date, and Count. The right side of the interface shows a detailed view of a "Cyber security" evaluation, including its general properties (Identifier: 3CDAAA4F1-D8A4-4C75-91AA-DE59275CB8F1, etc.), topics (Definition of cyber security, Your role in cyber security, etc.), and a QR code labeled "HYPERSECURE IT Platform Component".

SECURITY AWARENESS

Ensure sustainable security awareness.

IHRE HERAUSFORDERUNGEN

The majority of successful cyberattacks are the result of human error or misconduct. Attackers specifically exploit people to gain access to sensitive data via phishing e-mails and social engineering. They use manipulated media to infiltrate the company with malware. That's why you need to raise security awareness:

You want to increase employee awareness as part of your security strategy. Just one training session does not raise your employees' awareness sufficiently.

You want to run modern, event driven and relevant security awareness campaigns.

You need high-quality training content with integrated tests.

You need training certificates for audits.

UNSERE LÖSUNG

Reduces risks by raising your employees' security awareness – HYPERSECURE IT

Provides event-driven training that is continuously available online or offline and can be completely administered centrally

Displays interactive security-relevant information at the right time, e.g. when a USB drive or media is inserted

Shows scheduled and automated campaigns, for example once a week or month

Features ad-hoc publishing of response measures in the event of a security incident

Documents the implementation of protective measures in accordance with the GDPR

IHRE VORTEILE

- 1 Strengthens your human firewall by training your employees
- 2 Comes with flexible, cost-efficient and target group-oriented campaigns
- 3 Offers various and customizable media formats
- 4 Displays security-relevant information immediately and interactively for end users
- 5 Documents the implementation of protective measures as defined by the GDPR
